Key Partners - Owners’ Management Companies (OMCs) - Property developers - Energy providers (ESB, EirGrid) - Technology providers (EV charging, solar PV, & battery storage systems) - Data providers - (smart meter, weather APIs e.g. Met Éireann, & building telemetry)	Key Activities - Build & maintain AI coordination platform - Integrate with partner APIs (EV chargers, solar, & weather data) - Deliver onboarding, updates, & support - Improve AI models for learning & fairness - Manage partners & customer relationships Key Resources - Proprietary AI coordination software - Data-integration APIs (EV, PV, smart meters, weather) - Cloud analytics & hosting environment - Skilled energy & software engineers - Reputation & partnerships with OMCs / developers	Value Propositions For OMCs: Cuts collective energy costs & boosts long-term property value. For residents: Turns shared energy resources into simple, fair, & personal insights. For both: Transparent, data-driven coordination of EV, solar, & storage systems.	Customer Relationship - Annual SaaS license with OMCs - Collaborative onboarding & transparent reporting - Resident engagement through app-based fairness insights - Dedicated support for billing & technical queries Channels - Direct licensing to OMCs - Partnerships with energy tech providers - Referrals via property-management networks - Pilots supported by SEAI / local innovation schemes	Customer Segments Primary: OMCs managing multi-unit developments. Secondary: Property developers (for new build integration). End users: Residents accessing the personal-agent app.
Cost Structure - Software development & maintenance (AI platform, cloud hosting) - Data integration & API upkeep - Salaries (engineering, support, design / management) - Marketing, pilots, & administration - Customer support & training			Revenue Stream - Annual SaaS subscription (€2k-€4k per complex) - One-off integration fee - Partnership or API integration fees (with hardware providers) - Grants & green energy subsidies for innovation & pilot deployment
